

Agent performance analytics

Ability for the system to support the user to personalise their dashboard to display information that are applicable to them, for example:

- assigned tickets;
- tickets by status;
- tickets by priority;
- exceptions;
- KPIs;
- work order analytics.

Ability to track agent performance against specified KPIs.

Ability to monitor and track quality of service provided to customers through live, configurable and interactive dashboards, including (but not limited to):

- # of requests and cases raised;
- Current response rates - overall, by department, by channel;
- Performance tracking of KPIs.
